Details

Title:	A Polish company specializing in traffic safety equipment is looking for distributors and agents.
POD Reference:	BOPL20170112002
Summary:	The Polish company specializes in the production of the high quality plastic articles of a whole range of traffic safety (road barriers, roadblock signs, road cones, traffic dividing markers and posts) or construction products (Building containers and building buckets). The company wants to export its products to foreign markets and is looking for agents or distributors.
Description:	The Polish SME acts on the market a few years and successfully cooperates with many national and international partners. Currently the company has reached distribution agreements with companies from Germany, Sweden, Hungary, UK, and is looking for worldwide expansion. Since the inception of the company main priority was to deliver high quality product at an affordable price. The company's offer includes a wide range of products, such as: -Road barriers - Barriers are made of polypropylene. Available colors: white, red, green, blue, yellow. On special order company can produce barriers in other colors. Barriers can be used for assurance of safety and right organization of mass events, road traffic, building sites, separation of playground, parking spaces, restaurant gardens, etc. There is a special place on the barrier for logo, name of company or other information. -Roadblock signs - Roadblock signs are made of polyethylene in white and yellow colors. It is possible to produce them in different colors. Roadblocks increase the safety of road users and are used to mark obstacles on the roadway, islands separated by curbs, places where roadway separating lanes begin. -Road cones - Road Cones are made of soft fluorescent PVC in orange color with white bands. The company offers road cones in two sizes 500 and 750 mm height. Road Cones enable to show road track, short term road works, emergency dangerous places and protect freshly painted lines on the road. -Traffic dividing markers - Traffic dividing markers are made of polyethylene in green color. Prepared to be covered by reflective foil. They can be filled with sand or water to increase weight. The design of the dividing markers allows for storing them one on another which makes the transportation easier. Traffic dividing markers are effective for showing highway exits, lane divisions etc. -Posts - posts U21 are made of flexible material and offered in white, black and yellow colors. Posts U21 can be used for marking temporary lane narrowing or division (roadworks, modernization and etc.) -Rectangular container 40L, 60L and 80L or Round container 45L, 65L and 90L. The company is looking for suitable partners in foreign countries to expand their markets and not to depend just on the home market. They are looking for distributors and sales agents for their products to expand their export activity.
Advantages and Innovations:	Advantages that will benefit potential partners of the cooperation: - Company has received many awards for effective brand refreshing and the launch of a new quality products. - Very good quality and the reasonable prices, - The Polish company focuses on customised solutions and offers above mentioned products which require special know-how and manufacturing technology, - Top quality materials, - More than 20 years of experiences knowledge elements for increasing road safety. The company has created a recognizable brand in Poland and has a recognizable trademark.
Stage of Development:	Already on the market
Deadline Date:	1/16/2018 12:00:00 AM
